Retrofit Apron Front Farm Sinks Checklist

1 Is your countertop flat?

The counter top must be flat to ensure a proper installation.

Please Note – Countertops with a “no drip” edge will not work with this sink application.

YES NO

2 Is your sink base cabinet 36” wide?

Measure the face frame from the left to the right on your sink base to determine the width.

YES NO

3 Does your cabinet have false drawer fronts?

(Can be one or two false drawer fronts)

YES NO

4 Is the dimension between the cabinet stiles 33”?

This measurement is the open space from left to right when the false drawer front is removed.

Typically, this distance can be measured from the inside of the cabinet without removing the false drawer fronts.

YES NO

5 Measure the distance from the top of the door rail to the top of the cabinet.

Add 1-1/2” to the measurement to account for the countertop height.

The total will tell you which sink to choose.

Typically, this distance can be measured from the inside of the cabinet.

Measurement

Measurement + 1-1/2”

Total

Total

7-1/2” = Flat Apron Front

8” = Curved Apron Front

Please Note – 7-1/2” Flat Apron Front Sink can be used for an 8” opening by furring out the 1/2” gap (furring not included)

6 If you have answered yes to all of the questions you can choose one of the Retrofit Apron Front Farm Sinks listed on the website for your kitchen.
